

Joker's \$150 Progressive Knockout (PKO) Tournament

No Limit Texas Hold'em

\$150 (\$60 buy-in + \$60 bounty buy-in + \$30 entry fee)

20-minute rounds | 25,000 starting chips

Registration & re-entry are allowed until the end of the first break

Players may surrender stack for a full re-entry (\$60 buy-in + \$60 bounty buy-in + \$30 entry fee) on the last hand of re-entries if player has less than 25,000 chips. Surrendered chips will be forfeited back to the house and replaced with a full re-entry stack.

\$60 of every buy-in goes straight to the standard prize pool to be awarded according to the **Joker's Standard Prize Structure**. Each \$60 bounty buy-in is represented in the form of one bounty chip given to each player. These bounty chips are given to each player at the start of the tournament.

Upon knocking out another player, they are awarded half of the loser's bounty, while the other half of the loser's bounty is added to their own bounty. (IE, their bounty is worth \$60. Once they have knocked out another player whose bounty is worth \$60, they are awarded \$30, with the remaining \$30 being added to their own bounty, making their bounty now worth \$90. If they knockout another player whose bounty is worth \$60, they have now won a guaranteed \$60 and are themselves worth \$120 if knocked out.)

If half of a player's bounty value at the time they are knocked out is not a whole dollar amount, then the amount won by the player who knocked them out would be rounded up and the amount added to that player's bounty would be rounded down to the nearest five dollars. (IE the total bounty is \$105, so half would be \$52.50. In this situation, the player would win \$55 and \$50 would be added to their own bounty.)

All bounty values will be tracked by the floor supervisor on the corresponding **Joker's PKO Tournament Bounty Value Tracker** sheet. All bounties each player has won are to be paid out by the floor supervisor upon the player being knocked out of the tournament or tournament finish.
